# | ZAMOK TOUCHLESS

## Touchless Kiosk Interactions

- ✓ Air Mouse
- ✓ Mobile Touchpad

## AIR MOUSE

The Air Mouse touchless feature in the Zamok Enterprise Software Suite functions through hand gestures. An add-on camera tracks the kiosk user's hand to control the onscreen cursor for safe, germ-free navigation. This solution is highly intuitive and takes only seconds to learn.

## AIR MOUSE BENEFITS

### GERM FREE INTERACTION

Not touching the screen helps prevent the spread of germs and viruses.

### SELF CONTAINED

Does not require an external network connection to work

### INTUITIVE INTERFACE

Easy for visitors to learn and start using quickly.

### INCLUDED SOFTWARE

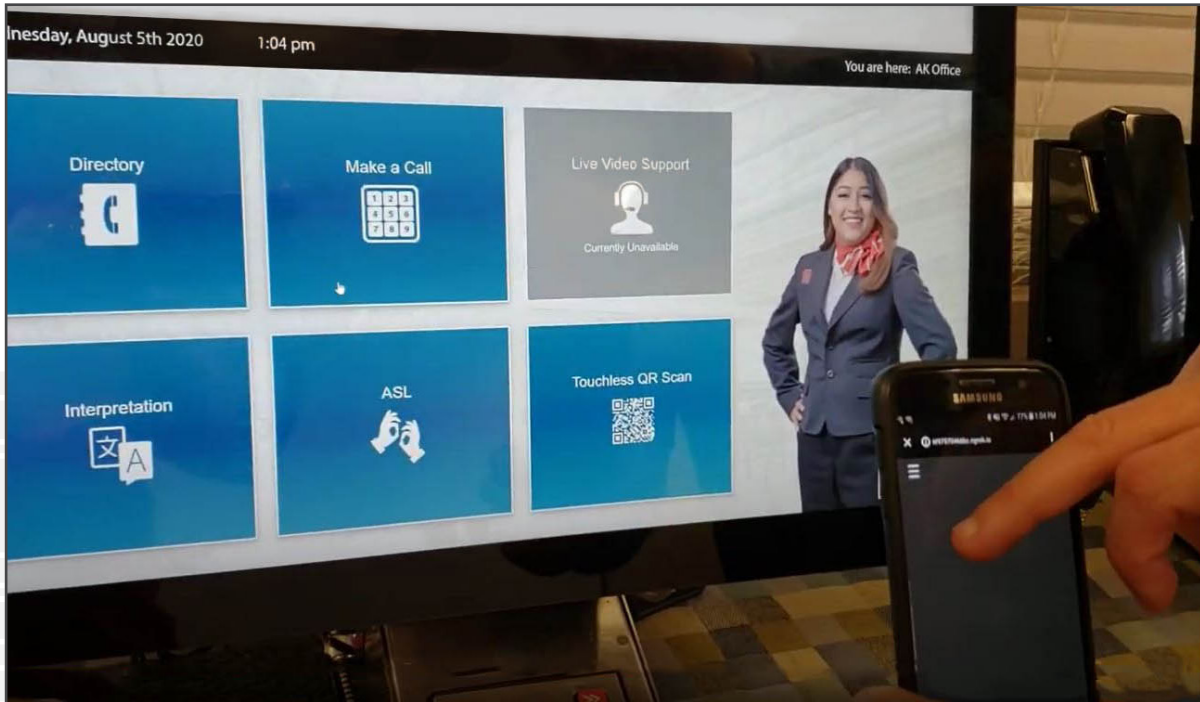

All necessary software is included in Zamok Enterprise

**UNMATCHED 3 YEAR WARRANTY**

LAST REVISED 08.05.2020

## MOBILE TOUCHPAD

The Mobile Touchpad feature in the Zamok Enterprise Software Suite allows control of existing kiosks through use of a mobile phone. Scanning a QR code pairs the mobile with the kiosk, letting a user navigate through the interface without ever touching the screen. This solution requires no changes to existing hardware or interfaces.

## MOBILE TOUCHPAD BENEFITS

### GERM FREE INTERACTION

Not touching the screen helps prevent the spread of germs and viruses.

### MONEY SAVING

Works with existing user interface and hardware  
*(network connection required)*

### SOCIAL DISTANCING

Can support multiple users without compromising social distance.
